

# Final exam: “Study Guide”

Math 2210-002/010

May 3, 2019

The final exam is cumulative. The additional sections to be covered are 5.1 - 5.4 and 6.1.

As usual, I have gathered a bank of questions from each of these sections that I intend to use to generate most of the questions regarding this material on the final.

The exam will be made up of  $1/3$  -  $1/2$  new material, with the remainder of the exam evenly split between exam 1 and exam 2 content. The previous study guides apply in the usual way to these portions of the exam.

If you have any questions, as always, let me know.

<b>Section</b>	<b>Exercises</b>	<b>True/False questions</b>
5.1:	13, 25, 31, 32, 35	21, 22
5.2:	7, 12, 17, 18, 19	21, 22
5.3:	1, 5, (11, 13, 18), 24, 27	21, 22
5.4:	(3, 5), (7, 8), (9, 10), 13, 23	
6.1:	(1, 2), (7, 8), (9, 10), (13, 14), (15, 18)
